Chapter

**11****Exhibit "C" to Voluntary Petition**

1. Identify and briefly describe all real or personal property owned by or in possession of the debtor that, to the best of the debtor's knowledge, poses or is alleged to pose a threat of imminent and identifiable harm to the public health or safety (attach additional sheets if necessary):

**The Debtor owns real property in Manatee County (the "Property") that accommodates a phosphogypsum stack system, a portion of which is used as an alternate disposal area for the management of dredge materials pursuant to a contract with Port Manatee and as authorized under an administrative agreement with the Florida Department of Environmental Protection. The phosphogypsum and the dredge materials also contain contaminated water that has come into contact with phosphogypsum and the dredge materials and are collectively referred to as the "Materials".**

2. With respect to each parcel of real property or item of personal property identified in question 1, describe the nature and location of the dangerous condition, whether environmental or otherwise, that poses or is alleged to pose a threat of imminent and identifiable harm to the public health or safety (attach additional sheets if necessary):

**The Property is directly east of the entrance to Port Manatee adjacent to the east side of U.S. Highway 41. The business address is 13300 U.S. Highway 41, North, Palmetto, Manatee County, Florida 34221. The Debtor acquired the Property from the Chapter 7 trustee of Mulberry Phosphate Company, the parent of Piney Point Phosphates, Inc. ("Piney Point"). Until 2001, Piney Point owned and operated a fertilizer manufacturing plant, which was abandoned upon the filing of the Mulberry Chapter 7 case. A by-product of the fertilizer manufacturing process is phosphogypsum, which is stored in Gypstacks like the ones at the former Piney Point site. Phosphogypsum is a primary byproduct of the wet-acid process for producing phosphoric acid from phosphate rock. Gypstacks are large impoundments containing contaminated water that has come into contact with phosphogypsum. A portion of the Gypstacks on the Property is also used as an alternate disposal area for the management of dredge materials pursuant to a contract with Port Manatee and as authorized under an administrative agreement with the Florida Department of Environmental Protection. The dredge materials are sediments collected from the floor of Tampa Bay as part of Port Manatee's Berth 12 improvement project. In the current state of storage, the Materials do not constitute an immediate threat of imminent and identifiable harm to the public health or safety and are regularly monitored in the ordinary course of business. However, if the Materials are not properly monitored and maintained, or if a Gypstack failure occurs, the Materials may pose a risk to the environment in the future.**
